

The total amount spent and the country for the Pending delivery status for each country.

Country	Status	Amount
UAE	Pending	53800
UK	Pending	136300
USA	Pending	65500

1. The total number of transactions, total quantity sold, and total amount spent for each customer, along with the product details.

Total number of transactions- This can be determined by counting the number of Order_ID entries for each Customer_ID = 250

Total quantity sold= The Order Table does not contain quantity information directly, so we might assume each order represents one quantity of an item. If multiple quantities per order need to be tracked, this would require additional information. So we have limited information available here.

2. The maximum product purchased for each country.

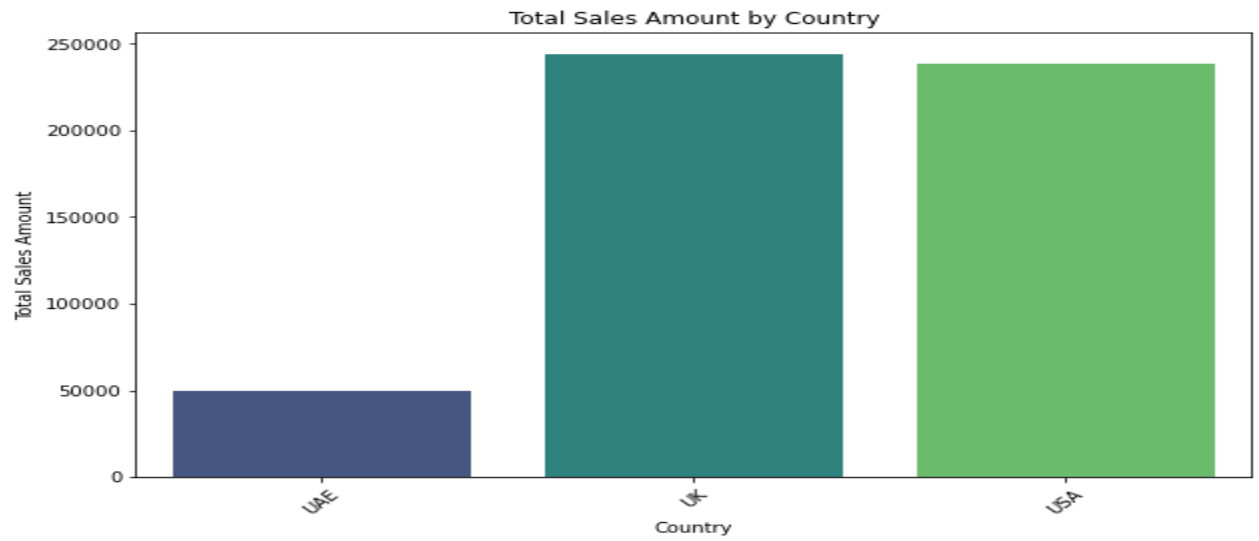

Country	Item	Amount
UAE	Harddisk	20000
UK	Monitor	156000
USA	Monitor	132000

3. The most purchased product based on the age category less than 30 and above 30.

Age_Category	Item	Amount
30 and above	Monitor	204000
Less than 30	Monitor	96000

4. The country that had minimum transactions and sales amount.

Country	UAE
Order_ID	40
Amount	49950

Number of transactions by Country
